Interpretive Caveats

The STAXI-2 was developed and standardized for use by psychologists and qualified professionals with adolescents and adults ages 16 years and older in a wide variety of settings. The STAXI-2 has been normed separately for males and females in three age groups, permitting greater interpretive specificity than many comparable self-report instruments.

The STAXI-2 may be administered by trained staff, but interpretation of the results, including those presented in this report, should only be undertaken by a professional trained in psychological testing, or who has completed certified training concerning the use of STAXI-2. Such training should include information on emotional states and personality traits, and their relation to health and behavior. Professionals trained in the use of the STAXI-2 are best able to interpret the results validly and appropriately.

This report is intended for use by qualified professionals. The report should not be given to the respondent, and feedback based on the report should be provided in ways that can easily be understood. Note that the STAXI-2 contains no validity scales. Therefore, if faking, malingering or other response biases are suspected, further testing is recommended to evaluate these possibilities.

STAXI-2 Score Summary

This Score Summary Table presents the raw scores, percentiles, *T* scores, and score levels (low, moderate, high, very high) for each valid STAXI-2 scale and subscale. The percentile results are shown graphically on a following page; the raw scores for each of the 57 items are reported in the Item Response Summary Table.

STAXI-2 Score Summary Table

Scale/subscale	Raw score	Percentile	<i>T</i> score	Score level
State Anger				
<i>S-Ang</i>	22	85	60	high
<i>S-Ang/F</i>	7	70	50	low-moderate
<i>S-Ang/V</i>	10	95	62	very high
<i>S-Ang/P</i>	5	50	36	low-moderate
Trait Anger				
<i>T-Ang</i>	19	70	54	moderate
<i>T-Ang/T</i>	5	40	44	moderate
<i>T-Ang/R</i>	11	80	58	high
Anger Expression and Anger Control				
<i>AX-O</i>	12	30	44	moderate
<i>AX-I</i>	16	60	52	moderate
<i>AC-O</i>	28	75	58	high
<i>AC-I</i>	24	50	50	moderate
<i>AX Index</i>	24	40	46	moderate

Note. “--” indicates a scale that is invalid due to an excessive number of missing items.

STAXI-2 Item Response Summary Table

State Anger		Trait Anger		Anger Expression and Anger Control			
Item	Response	Item	Response	Item	Response	Item	Response
1.	1	16.	2	26.	4	42.	3
2.	1	17.	1	27.	2	43.	1
3.	2	18.	1	28.	3	44.	3
4.	1	19.	3	29.	2	45.	2
5.	1	20.	3	30.	3	46.	3
6.	1	21.	1	31.	2	47.	2
7.	1	22.	2	32.	3	48.	3
8.	1	23.	2	33.	2	49.	2
9.	2	24.	1	34.	4	50.	4
10.	2	25.	3	35.	1	51.	1
11.	1			36.	3	52.	3
12.	2			37.	1	53.	2
13.	3			38.	4	54.	3
14.	1			39.	2	55.	1
15.	2			40.	3	56.	3
				41.	3	57.	2

Profile of STAXI-2 Percentiles

Note. Age-specific norms for normal females have been used for the profile above.

For additional normative information, refer to Appendix A in the STAXI-2 Professional Manual.

“---” indicates a scale that is invalid due to an excessive number of missing items. “♦” indicates a scale with missing items.

Profile of STAXI-2 T Scores

Note. Age-specific norms for normal females have been used for the profile above.
 For additional normative information, refer to Appendix A in the STAXI-2 Professional Manual.
 "----" indicates a scale that is invalid due to an excessive number of missing items. "♦" indicates a scale with missing items.
