Interpretive Caveats

The test scores, descriptions of performance, and other interpretive information provided in this report are predicated on the following assumptions. First, it is assumed that the TOGRA was administered and scored in adherence with the general and specific administration and scoring guidelines provided in chapter 2 of the TOGRA Professional Manual (Reynolds, 2014). Second, it is assumed that the examinee was determined to be eligible for testing by the examiner according to the guidelines for testing eligibility provided in chapter 2 of the TOGRA Professional Manual and the examiner was qualified appropriately to administer and score the TOGRA.

This report is intended for use by individuals appropriately qualified and credentialed to interpret the TOGRA under the laws and regulations of their local jurisdiction and meeting the guidelines for use of the TOGRA as stated in the Professional Manual (see chapter 2).

TOGRA Interpretation

Sample Client took the TOGRA on 06/23/2014 . He earned a raw score of 49, which corresponds to a GRI of 137. On the TOGRA, this level of performance falls within the range of scores designated as significantly above average and exceeds the performance of 99% of individuals at Sample Client's age. Chances are 90% that his GRI lies within the range of 128 to 140.
